VC4
Piombo
Lead

I piani in cristalceramica provengono dalla tecnologia costruttiva del gres ceramico.

Realizzati con impianti ed attrezzature molto avanzate, uniscono allo spessore ridotto, un'elevata resistenza alle sollecitazioni meccaniche, ai prodotti chimici, all'usura, ai graffi, all'abrasione e resistono al gelo ed al fuoco.

Il processo di cottura a 1200 gradi di vari impasti di argilla, sabbia, silice ed altre sostanze naturali ne garantiscono l'assoluta originalità e massima riciclaggio ambientale.

Leggerissime imperfezioni di superficie e di lievi differenze cromatiche sono da considerare elementi naturali che ne accertano l'originalità e l'autenticità del prodotto.

The tops in cristalceramic come from construction technology of ceramic stoneware.

Made with highly advanced facilities and equipment, combine to the reduced thickness, high resistance to mechanical stresses, chemical products, wear, scratches, abrasion and they are resistant to frost and fire.

The cooking process at 1200 degrees of various mixtures of clay, sand, silica and other natural substances guarantees the absolute originality and maximum environmental recycling.

Slight surface imperfections and slight color differences are considered natural elements which ensure the originality and authenticity of the product.
